Interested in a research career in finance?

PhD Scholarships in Finance

The Department of Finance is currently inviting applications for new doctoral scholarships starting August 2018. The PhD program focuses on developing doctoral students' theoretical knowledge and methodological skills required to become successful researchers in the area of finance.

We encourage applications from students with solid quantitative skills, who have a strong background in disciplines such as finance, economics, statistics, and mathematics, and who possess strong communication and analytical skills.

We welcome research interests, theoretical or empirical, in areas such as asset pricing, corporate finance, corporate governance, portfolio management, banking, market microstructure, and behavioral finance. We expect our graduates to be employed at leading academic institutions, at international or national regulatory organizations, or in the financial industry.

The Department of Finance consists of highly international faculty (over 15 nationalities) with PhDs from some of the world's best universities (Berkeley, Ohio State University, University of Chicago, USC, among others). The department has a strong focus on research in both asset pricing and corporate finance and hosts a research center in each area. The doctoral programme is an important element of the department's research agenda and of BI's vision of being one of the leading research business schools in Europe. Selected candidates will be working closely with faculty and will join a group of 8-10 PhD students in the department.

Eligible applicants must have completed a Master of Science degree with thesis work, a research Masters/M.Phil degree, or a comparable degree relevant for the specialisation in Finance by the early autumn of 2018, with a grade point average of B or higher. Application deadline: February 1, 2018.

More information and instructions on how to apply may be found on BI's webpage:
